

Beautify Shaver

Beautify Fresno was started in 2023 by a group of local citizens that wanted to make the Shaver Lake community one to be proud of. They identified areas of the town that had not been maintained and with their own blood, sweat and tears transformed overgrown flower beds into beautiful planter boxes that visitors and locals alike would be impressed with. Most their materials were donated by local nurseries and personal contributions. They would love to expand their group for anyone else who is interested in donating time or materials.
